Create Album

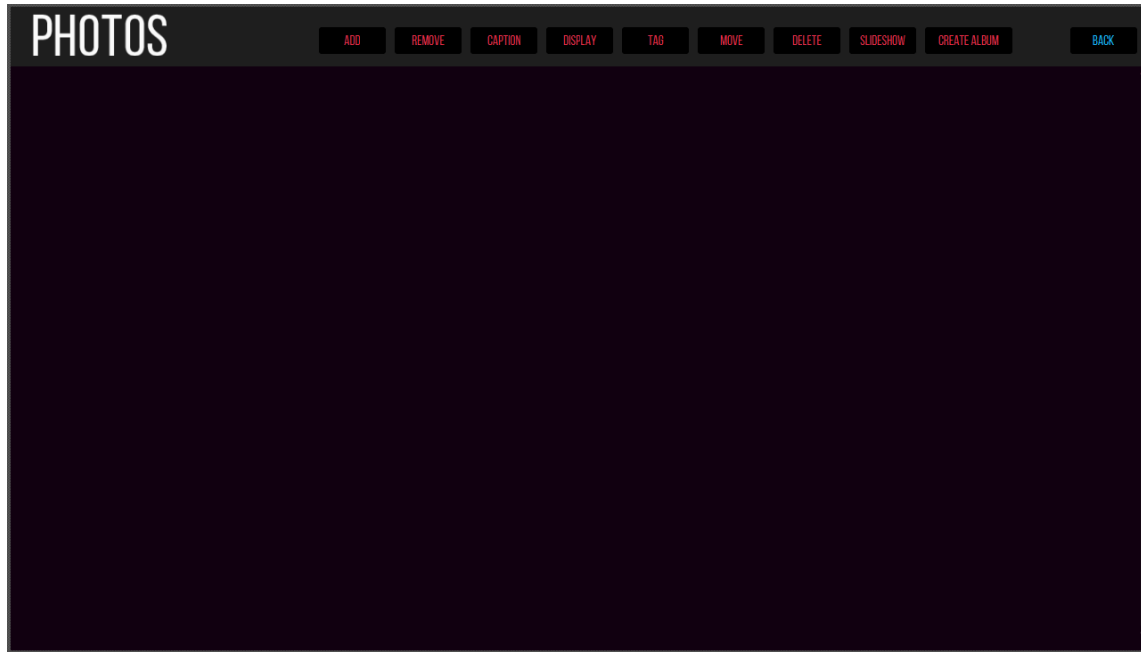

CREATE

Enter Album Name

OK CANCEL

- Create – Takes all the selected pictures and then uses the Textfield to get user input for the album name and creates an album.

Open Album

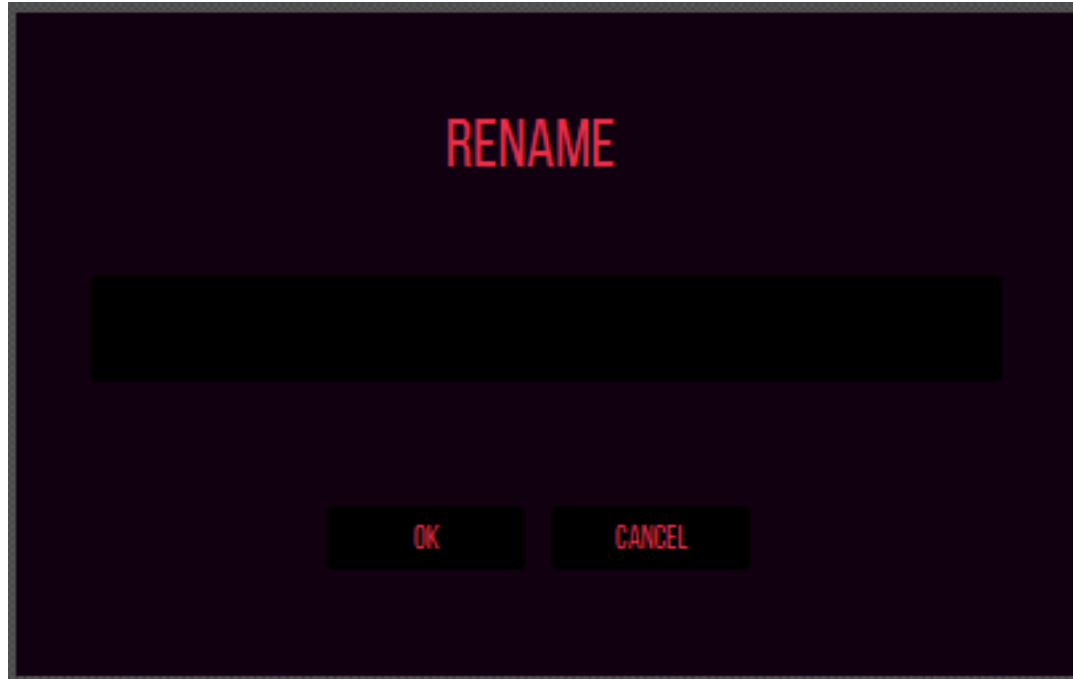

- When you select the album and hit open album it loads up the photo view that displays all the photos in that album. You have the functionality to add photo, remove photo (java prompt), adding/changing caption (Slide 10), Display (Slide 11), Add or delete tags (Slide 12), Move Pictures (Slide 13), Slideshow (Slide 14), Create Album (slide 5)

Delete Album

Confirmation Prompt using java.

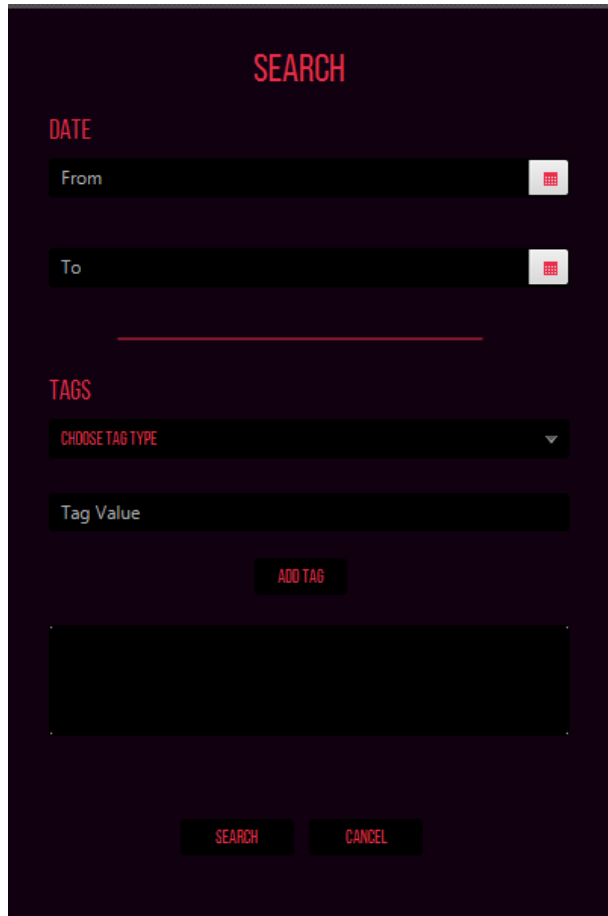

- When the user hits the button it pops up a confirmation dialog from java saying that it has been deleted.

Rename Album

- When you hit the rename button this window will pop up asking what you want to rename the existing album. It will already have the text field populated with the old name and we will populate the changes once the user hits ok.

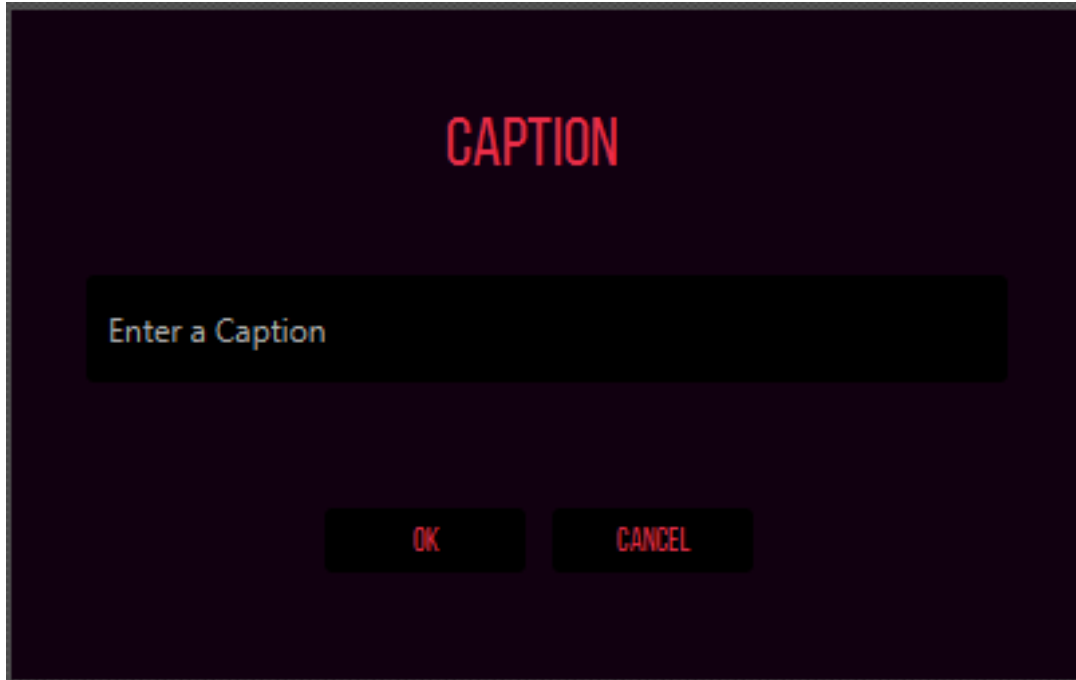

Search

The image shows a dark-themed search window titled "SEARCH" in red. It contains two main sections: "DATE" and "TAGS". The "DATE" section has "From" and "To" text inputs, each with a red calendar icon on the right. The "TAGS" section features a dropdown menu labeled "CHOOSE TAG TYPE" in red, a "Tag Value" text input, and a red "ADD TAG" button. Below these is a large, empty rectangular area for displaying results. At the bottom are two buttons: "SEARCH" and "CANCEL", both in red.

- When you hit the search button this window opens up which allows user to search using a date range and tags. You can select the From-To on front and then for tags select the tag type from the dropdown and the tag value in the textfield and add the tags in the search field. You can add multiple tags and then when you hit search it takes all the parameters entered and populates the view based on the query strings.

Caption Photo

A dark-themed dialog box titled "CAPTION" in red. It features a text input field with the placeholder text "Enter a Caption" and two buttons at the bottom: "OK" and "CANCEL", both in red.

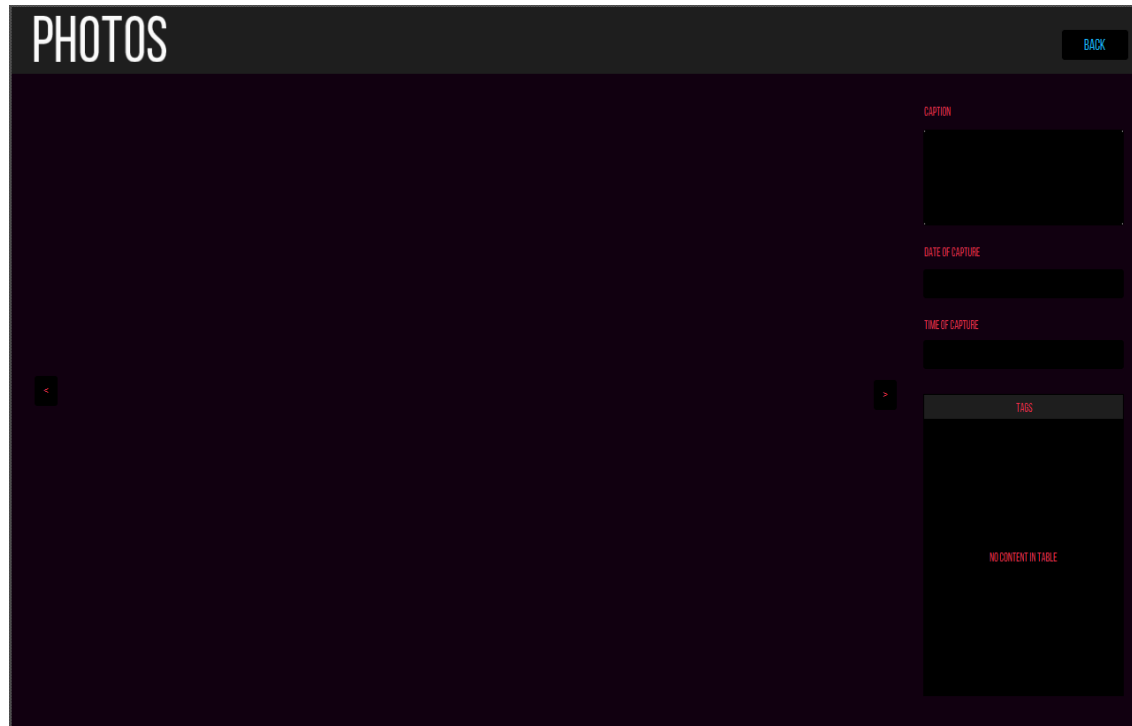

CAPTION

Enter a Caption

OK CANCEL

- Caption. Add / Rename caption of the photo.

Display Photo

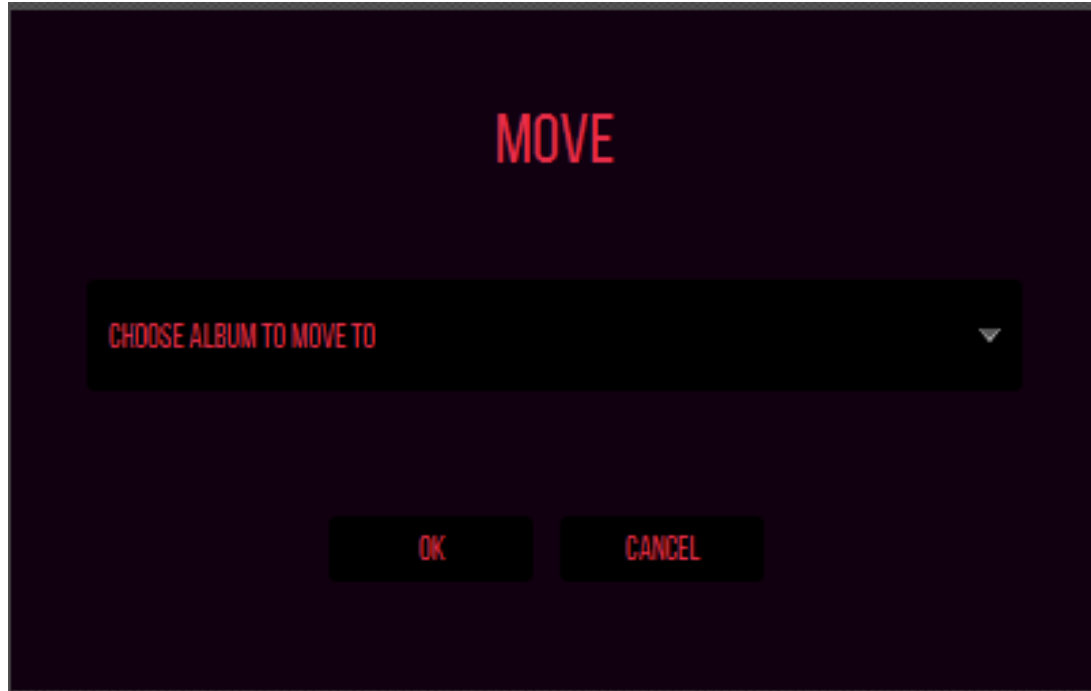

- When you hit this button it populates this pane. It allows you see the photo and the details such as the caption, date of capture, time of capture, and tags. It also lets you move to the next or previous photo with the arrow buttons on the left and right of the photo view.

Tag Photo

The image shows a dark-themed dialog box titled "TAG" in red. It is divided into two main sections: "DELETE TAG" and "ADD TAG", both with red headers. The "DELETE TAG" section contains a dropdown menu labeled "CHOOSE TAG TYPES" and a red "DELETE TAG" button. The "ADD TAG" section contains two text input fields labeled "Tag Type" and "Tag Value", followed by a red "ADD TAG" button. Below these fields is a large, empty text area. At the bottom of the dialog are two buttons: "OK" and "CANCEL", both in red.

- When you hit the tag button this prompt pops up. It allows you to delete tags from the dropdown. It also allows you to add tags using the text fields. When you hit Add tag button it creates the tag using the query string and populates the text area below, and you can add multiple tags. When you click OK all changes are fin

Move

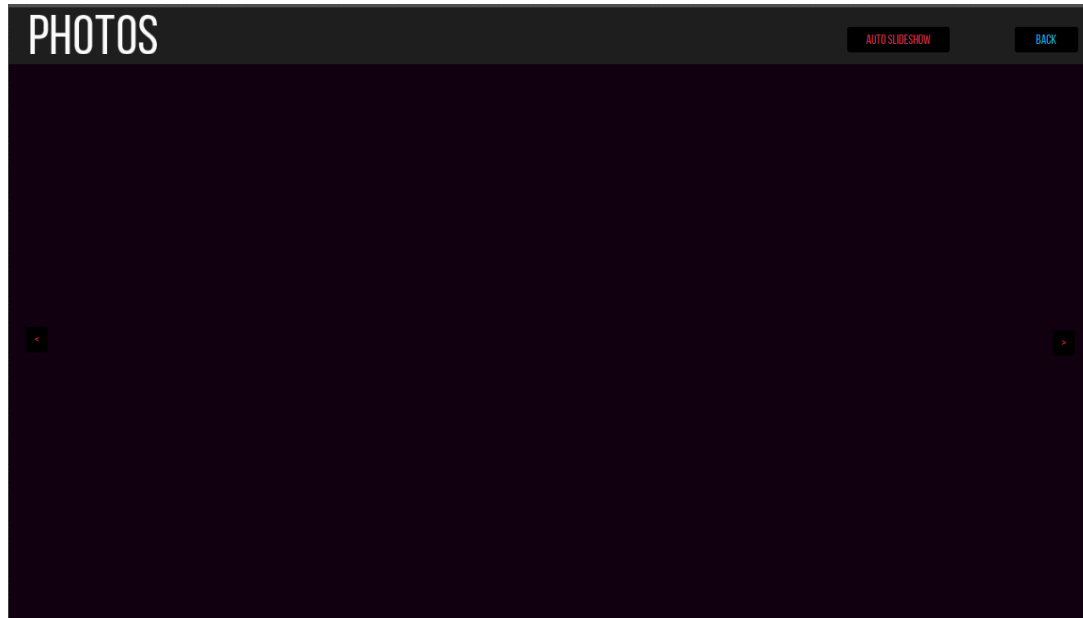

- When you hit the move button this prompt pop up and you can select the album that you want to move the photo to from the dropbox.

Delete Photo

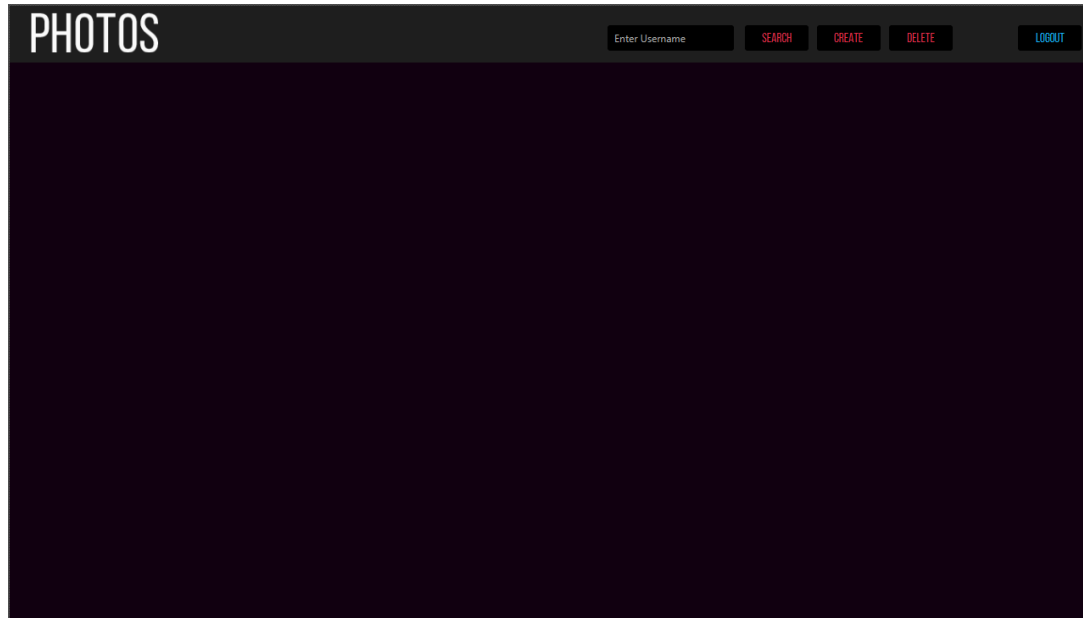

- Java prompt
- When you hit the button it prompts a button that confirms the deletion.

Slideshow

- When you hit the slideshow button this window opens up which allows user to view all photos in a slideshow. The auto slideshow button allows you to toggle between automatic and manual slideshows.

Admin Page

- Admin View – For Admins. Displays all the users. Allows admins to create, delete and search users. Also logout.
- Create – Prompts user to enter the text to create user. (Same as slide 5 but the field asks for username)
- Delete – Prompts user to delete the selected user. (Same as slide 7 but for users)
- Search – Takes the value from the search field and finds the respective user.
- Logout – Saves the session and logs the user out.
